

Dear President Obama, *or Someone Who Cares*:

For centuries our government and founding fathers to the Constitution of the United States of America have promoted each citizen to use the gift of the human mind to pursue a career that promotes homeostasis and equilibrium for the development of self worth (for example, the American dream). Human beings travel through time trying to find ways to create new technological boundaries to advance the movement of America, but often find obstacles or hardships that interfere with this process.

Even when Columbus discovered this beautiful land back in 1492, there was a vision of "hope, power, success" by everyone to make a complete unified body built on the foundation of "ethics and civic responsibility" causing rotational spirals known as paradigm shifts in society. The final result is the beautiful experience of "life, liberty, and pursuit of happiness" by each American.

Well, my family has had their world turned upside down as an innocent woman suffers in a Kentucky Prison, my sister Dawn Marie Hanna, US v. Hanna, Case # 07-20355.

I know that you are very busy making change in this great country, but in your cabinet, could you please find time, *very soon*, to look at my sister, Dawn's case? Please. As you will be spending the holidays with your daughters, we would like to have our family together, also.

Here is her story:
